Professional Summary

I'm a full-stack web developer with 3 years of experience in building backend systems with Node.js and frontend interfaces using React. Before moving into tech, I worked in healthcare, a background that now gives me a unique perspective when working on health-related and data-driven projects. Over the years, I've developed scalable applications for clients in industries like game, finance, sales, and healthcare. I'm especially interested in combining my medical background with my technical skills to contribute to meaningful work in areas like AI and bioinformatics.

Work Experience

FREELANCER

Jul 2024 – Present | Ho Chi Minh City, Vietnam

- **Project: Teamfight.lol**
 - Role: Frontend Developer
 - Collaborated directly with U.S. clients to gather requirements, clarify expectations, and estimate timelines for new features.
 - Developed and maintained a responsive web design, optimized performance and usability across various devices for a Teamfight Tactics analytics platform.
 - Technologies: Vue.js
- **Project: Satorie**
 - Role: Frontend Developer
 - Initialized project repositories and integrated essential libraries, including email services, for a CFO/strategy consulting platform for SMBs.
 - Collaborated with developers throughout the design and development lifecycle.
 - Optimized applications for SEO and ensured responsive design across devices.
 - Deployed applications to production environments and provided post-release monitoring and support.
 - Technologies: React.js, Next.js

HDWEBSOFT

Oct 2021 – Jun 2024 | Ho Chi Minh City, Vietnam

- **Project: Airmason**

- Role: Backend Developer
- Communicated with U.S. clients to understand requirements, clarify expectations, and estimate timelines for new features on an employee handbook platform.
- Developed and maintained high-performance APIs, significantly optimizing latency.
- Integrated Human Resource Information Systems (HRIS) such as OneLogin, Okta, and BambooHR.
- Designed and implemented database structures (MySQL) and wrote optimized SQL queries.
- Ensured data integrity and security through robust measures.
- Managed data migrations and backups, maintained database synchronization with model changes.
- Implemented security features against vulnerabilities (CSP, XSS, Insecure Cookies, Denial of Service).
- Handled concurrent requests to ensure efficient API performance.
- Implemented authorization and authentication mechanisms (OAuth 2.0, JWT, Basic Auth) to secure API access.
- Developed features for exporting data in CSV and PDF formats.
- Conducted testing and debugging to ensure product stability.
- Participated in daily stand-ups to report progress and address blockers.
- Technologies: Node.js, Express.js, MySQL, TypeORM, GraphQL, OAuth 2.0, JWT, Basic Auth, Google Cloud Platform, Microsoft Azure, Redis

- **Project: Boho**

- Role: Backend Developer
- Wrote and managed API resources for a charitable contribution platform integrating with VEND Point of Sale.
- Implemented authorization and authentication mechanisms (OAuth 2.0, JWT) to secure API access.
- Integrated the VEND API to facilitate transactions.
- Designed and implemented database structures (MongoDB) and optimized NoSQL queries.
- Ensured data integrity, security, migrations, and backups.
- Built reusable code and libraries to accelerate development.
- Technologies: Node.js, Express.js, MongoDB, Typegoose, GraphQL, OAuth 2.0, JWT, Redis

- **Project: Cadence Bike**

- Role: Backend Developer

- Developed serverless functions using Node.js and AWS Lambda for a bike subscription service with Admin, Employer, and Employee portals.
- Integrated MongoDB for efficient data storage and manipulation within serverless functions.
- Wrote unit tests (Jest) to ensure code quality and reliability.
- Debugged and troubleshooted serverless functions.
- Collaborated with the team to ensure seamless integration with other systems.
- Technologies: Node.js, Express.js, AWS Lambda, MongoDB, Mongoose, JWT, Jest
- **Project: CrowdClip**
 - Role: Backend Developer
 - Updated and maintained API functions to ensure optimal performance for an AI-based face detection platform.
 - Developed new APIs to meet evolving business needs.
 - Estimated timelines accurately for feature development.
 - Collaborated with team members to align API functionality with project goals.
 - Technologies: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT, Amazon Web Services
- **Project: PAG**
 - Role: Backend Developer
 - Maintained and developed APIs for a private office staff management system.
 - Optimized code for maximum speed, scalability, and efficiency.
 - Designed and implemented database schemas using Materialized Path (Path Enumeration) in TypeORM for efficient hierarchical data management.
 - Tested APIs, identified bugs, and applied necessary fixes.
 - Collaborated with the team for seamless integration and performance.
 - Technologies: Node.js, Express.js, MySQL, TypeORM, GraphQL, JWT
- **Project: Framely**
 - Role: Backend Developer
 - Designed and implemented database structures (PostgreSQL) and optimized SQL queries for an NFT marketplace.
 - Ensured data integrity and security.
 - Wrote and managed API resources to ensure seamless functionality.
 - Developed the Framely SDK to streamline API integration for frontend developers.
 - Collaborated with frontend developers to ensure smooth communication between the SDK and APIs.
 - Ensured API resources were well-documented and reusable.
 - Technologies: Node.js, Express.js, PostgreSQL, TypeORM, RESTful APIs, Microservices Architecture, JWT
- **Project: My Fitness Studio**
 - Role: Backend Developer

- Updated and maintained API functions to ensure continued performance and reliability for a personal health and fitness application.
- Technologies: Node.js, Express.js, DynamoDB, Elasticsearch

HO CHI MINH CITY CENTER FOR DISEASE CONTROL

Dec 2017 – Jun 2021 | Ho Chi Minh City, Vietnam

Health Quarantine Officer

- Supervised international arrivals at Tan Son Nhat International Airport to assess epidemiological risks. Evaluated passengers with symptoms or travel history to affected areas, conducted on-site health screening, and determined quarantine requirements.
- Developed and automated a health quarantine declaration system using Selenium, VBA, and Excel, which significantly improved efficiency in passenger data processing at entry points.
- Designed a screening program to automatically classify incoming travelers into appropriate isolation routes based on risk level, which helped reduce congestion during the COVID-19 pandemic.
- Initiated and implemented a system (using Visual Basic) to extract and compile maritime health inspection data from the National Single Window Portal, which enhanced the tracking of vessel health clearance procedures (2019).
- Composed weekly epidemiological reports summarizing global disease outbreaks and emerging health threats, providing key insights for internal strategic planning and frontline decision-making.

Recognition:

- Certificate of Merit from the Ho Chi Minh City Department of Health for outstanding contributions to COVID-19 prevention and control (2020).

Education

CYBERSOFT - CYBERLEARN PROGRAMING EDUCATION CENTER

Jan 2021 - Dec 2021 | Ho Chi Minh City, Vietnam

Full-stack Web Developer Program

PHAM NGOC THACH UNIVERSITY OF MEDICINE

Aug 2011 - Aug 2017 | Ho Chi Minh City, Vietnam

General Practitioner (Medical Doctor)

Skills

- **Programming Languages:** JavaScript, TypeScript
- **Web Development:** HTML, CSS, Node.js, Express, React.js, Vue.js, Next.js
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, TypeORM, Mongoose, Typegoose, Elasticsearch
- **API Development:** REST, GraphQL
- **Cloud Platforms:** AWS (Lambda, S3, EC2, RDS), GCP, Azure
- **Tools & Platforms:** GitLab, GitHub, Jira, Asana, Trello, Docker, Postman
- **Testing:** Jest
- **Version Control:** Git
- **Methodologies:** Agile/Scrum, Microservices Architecture, Serverless Architecture, CI/CD Awareness
- **Languages:** Vietnamese (Native), English (Good communication and writing skills)
- **Professional Skills:** Problem-solving, Time management, Teamwork and collaboration, Attention to detail, Adaptability, Self-learning
